

The Dartmouth invention2impact Committee

Last Updated: July 8, 2024

Charge:

The invention2impact group will draw on their own experience, internal and benchmarking information gathered by a dedicated team of consultants, and extensive follow-up queries to map the existing infrastructure (internal institutional resources and practices) and ecosystem (intramural, affiliated, community-based, and national networks) that support the translation of patentable Dartmouth innovations in science and technology to broader societal impact, and identify opportunities for improvement. With support from the consultants, the i2i group will then guide the preparation of a report that synthesizes the findings and makes specific recommendations to the Provost, each designed to help Dartmouth maximize the societal impact of its STEM discoveries relative to our current state and our peer institutions, e.g., by enhancing the internal infrastructure or strengthening or broadening relevant external relationships within its STEM translational ecosystem.

Membership:

<u>Name</u>	<u>Title</u>
Dean Madden (chair)	Vice Provost for Research
Will Griffith, '93	Trustee, ICONIQ
Gevorg Griforyan	Research Associate Professor of Computer Science, Generate Biomedicines
Kat Mirica	Associate Professor of Chemistry, Advanced Materials
Laura Ray	Myron Tribus Professor of Engineering Innovation
Charles Sentman	Professor of Microbiology and Immunology, Director for Synthetic Immunity
Todd Sisitsky, '93	Trustee, TPG Global
Chris Snyder	Joel Z. and Susan Hyatt Professor of Economics
